Techni-Lux

of Orlando will now exclusively distribute all of **SGM's** product line in the US. "We are proud to have SGM products, as they are one of the true industry innovators. We quickly saw why many European designers are specifying and switching to SGM for concerts and TV shows. We know American designers will enjoy the various excellent features and brilliant, razor-sharp effects," states Alex Gonzalez, vice president of Techni-Lux, adding, "SGM's new silent fixtures will be a perfect fit for our theatre, TV studio, and church markets."
